*Seize this magnificent opportunity to get to know Paris, its most important landmarks and works of art, and the most impressive sights in Normandy! Students will study significant monuments, museum collections, and other cultural sites in and nearby these French cities. As the course progresses, students will construct a history of France through its art and culture—a place with ancient Roman beginnings that would emerge as the wellspring of modern thought.*

*Veteran TCNJ faculty program directors Dr. Fichner-Rathus and Dr. Riccardi will lead students and showcase the most important sites of artistic and archaeological significance, from Roman Gaul to the Centre Pompidou of the modern era. Students without any prior background in art or art history are welcome to join in the adventure!*
