 7. MATHS/SCIENCE/ART | 204 | 8. MATHS/SCIENCE/ART | 205

Interested in Illustration?

Students with an interest in illustration can practice in traditional and digital mediums to improve their hands-on technical skills. Fine Art courses such as Drawing 1, Drawing 2, Painting, Printmaking, etc., and Graphic Design courses can help students understand the business and communication applications of illustration. Several students have designed their own majors in Medical Illustration, taking both Biology and Studio Art courses.
